Password Management [1]

A strong password can protect against cyberattacks.

CU System employees are required to reset their username and password every 180 days with a new minimum password length of 12 characters.

Employees can reset their password themselves following these self-service password instructions [2]. If you experience any issues, contact the UIS Service Desk at 303-860-4357 (HELP) .

Passwords must have:

- At least one uppercase letter
- At least one lowercase letter
- At least one numeral
- At least one special character
- At least 12 characters in length
- Cannot be one of your previous passwords

Follow these password creation tips [3] to maximize your protection against cybercrime.

Locked out? Recover your password [2] to regain access to your account.

Resetting a CIW Password?

You can reset your password by following the step-by-step instructions [4].

If you encounter issues with resetting your CIW password, please contact access@cu.edu [5].
