1. **Journal Ln Desc** = Item description preceded by, if entered, the line's financial report comments (**Note:** Information on entering financial report comments can be found in [Adding Details to Shopping Carts](#) ^[2].)
2. **Actual** = Item's invoiced amount (**Note:** Negative amount, in parentheses, documents entry of credit from supplier.)
3. **Encumb** = Item's encumbered amount (**Note:** Negative amount, in parentheses, decreases encumbrance.)
4. **BAE Code:**
 - o ACTUALS = Actual expense (i.e., invoice/voucher entry)
 - o EN_PO = PO encumbrance
5. **Src Code:**
 - o AP = Accounts Payable entry of invoice/voucher
 - o PO = CU Marketplace entry of encumbrance
6. **Journal Date** = Entry date of transaction
7. **REF:**
 - o Actual expense = Voucher #
 - o PO = Blank
8. **PO** = Item's PO #
9. **Invoice ID:**
 - o Actual expense = Supplier's invoice #
 - o PO = Blank
10. **Vndr Name** = Supplier's legal name (For example, the catering company Biscuits & Berries appears as *NO KA OI INC*, which is its legal name.)

Each line item of a Purchase Order (PO) will appear on your m-Fin Financial Detail as an:

- Encumbrance 1 day after the PO is created. PO creation means the shopping cart has

been turned into a requisition, and, if necessary, the requisition has been fully approved.

Note: Payment Vouchers (PVs) don't encumber – they appear only as an actual expense, see #2 below.

- Actual expense 1 day after the invoice (voucher) becomes payable (i.e., receiving has been done, if necessary, and the voucher is fully approved). This will also result in a second transaction line decreasing the encumbrance by the voucher amount (except for PVs)
