Energy-efficient lighting can significantly conserve energy and reduce greenhouse gas emissions. According to the U.S. Department of Energy, LED bulbs use 75% less energy and last 25 times longer than incandescent bulbs.

Choose

- LED lamps
- Energy Star certified lamps and fixtures
- The correct brightness (lumens) for the space

Avoid
• Overly lighting the space
• Incandescent bulbs

End of Life

• Recycle fluorescent lamps with vendor

Environmental Labels
- Energy Star; e-Stewards
