CAPA, “Modern Physics,” and “Classical Mechanics”? [1]

Professor John Taylor
Physics Department
University of Colorado Boulder

My student Andi Pascarella just finished her Ph.D. with a thesis that studied the effectivenenss of the computer-based homework system called CAPA, which we have been using in the inroductory physics coursed for the last 4 or 5 years.

Now that the project is complete, my main activity (and an all consuming one) is to finish the second edition of the Taylor-Zafiratos book on "Modern Physics" and the 1st edition of my book on "Classical Mechanics," both of which are supposed to de done by the end of this school year.

Groups audience:
President's Teaching Scholars Program
