About [1]

The Office of Information Security, part of System Administration, collaborates with campuses to offer services and expertise that ensure the confidentiality, integrity, and availability of data across the university.

Information Security Officers

Campus Information Security Officers (ISOs) serve in a variety of technical and non-technical roles. Some responsibilities include providing day-to-day program management; advising on IT security issues, evaluating risks to university information, and preparing, approving, and maintaining policies, procedures, and guidelines.
