Automic/UC4 [1]

Automic (UC4) is the application used to schedule all university batch data processes.

It authorizes uploaded data, ensuring secure distribution of requested information and is managed by the UIS Production Services team.

Integrated with PeopleSoft, Linux and AUTO-RC, Automic facilitates automated processes across mulitple platforms including Finance, Human Resources and data warehousing.

Automic is available to anyone responsible for batch processes for the university. Automic update access is only approved for Production Service personnel, but read-only access is granted to campus users and developers.

Request Access [2]
