

Batch Processing (Automic) ^[1]

Overview: Automic is the application used to schedule all university batch data processes. It authorizes uploaded data, ensuring secure distribution of requested information.

Benefits: Some of the benefits of Automic include:

- Statistics and change history
- Cross system internal and external job dependencies
- Calendar keyword scheduling
- Authentication of user uploaded files
- Separates Development and Production environments
- Automatic "Abnormal Process End" notification and texting

Who is eligible to use the service: Automic is available to anyone responsible for batch processes for the university. Automic update access is only approved for Production Service personnel, but read-only access is granted to campus users and developers.

How to request access to the service: Create a JIRA and assign it to Production Services.

Alias Information / Service History: You may hear this system referred to as Production or Batch. The system was previously referred to as UC4.
