

Current UIS Projects and Initiatives ^[1]

Below, you will find details of all current UIS projects and initiatives in the planning and execution phase. It does not include:

- Projects in the initiation phaseInitiation PhaseNew UIS project requests are submitted. High-level details are provided to the UIS Leadership, who determine whether the project should move into the planning phase. ^[2] and closing phaseClosing PhaseThe team undertakes the necessary tasks to close the project. This includes, but is not limited to, post-production support, transition to operational service and the collection and analysis of lessons learned. ^[3]
- version updates
- PUMs
- regular maintenance projects

Questions?

If you have question about a project, click the link under the questions column to email the project manager.

PROJECT NAME	PROJECT SUMMARY	PROJECT PHASE <u>Project phase</u> <u>The project phase identifies where a project, or initiative, is in its cycle. It begins with the planning phase and ends with the closing phase.</u> ^[4]	PROJECT HEALTH <u>Project health</u> <u>The project health identifies how a project, or initiative, is doing in terms of budget, timeline and scope.</u> ^[5] (DURING EXECUTION)	QUESTIONS? AWS Foundations

This project will build the foundation of a cloud infrastructure - specifically on AWS - in which future production and non-production workloads can successfully operate on in a secure, reliable, and performant manner.

The adoption of cloud infrastructure is identified within the UIS MultiCloud Phase 1 and 2 goals as well as supports UIS strategic goals aligned to overarching University initiatives.

New Service Framework Stage 2b: Future State Business Process Design

The UIS reorganization and New Service Framework will strengthen campus partnerships to more effectively set strategy and coordinate efforts. In addition, UIS and campus partners will benefit from a holistic view of the delivery pipeline.

This effort was identified as a top opportunity in the department's organizational maturation as it responds to the speed and quality of expected changes. This effort supports IT Governance's IT Strategic and Annual Plan efforts.

**NextGen
Donor
Management
Platform**

The Advancement Next Generation Donor Management project (Next Gen) is a three phase, multi-goal, cross-campus plan that will have positive and far-reaching University-wide benefits in efficiency savings, cost reduction, and increased private support for the University of Colorado (CU). This request is to support years four, five and six of a nine-year Advancement business strategy that will transform constituent engagement from a disparate, unlinked system to a unified platform while still providing campus and entity Advancement

**eRA Boulder
Conflict of
Interest (COI)
Module
Implementation**

The Conflict of Interest (COI) Module, part of the InfoEd suite of eRA applications, is being implemented at the Boulder campus to replace custom software (DEPA) that is at end of life.

This implementation will bring the COI business processes into the InfoEd eRA system and further integrate the COI process with other eRA modules, such as Proposal Tracking (PT), Award Tracking (AT) and Human Subjects (HS), making it easier for the business offices to have visibility into Conflict of Interest through the grant lifecycle.

Execution
Execution

Fall
2020

This project will support the resolution passed by the Board of Regents in November, 2017. The infrastructure will be a single investment to support all online education initiatives launched by campuses. This infrastructure will connect campus-specific MOOC/LMS systems to CU enterprise systems such as the student information system, degree audit, finance, master data management, and other enterprise-wide systems.

Online Resolution: Phase III

Additional details include:

- One foundation supporting all campuses - Standardized integration platform
- A scale-able solution - Automation of processes so less manual

**Open
 Enrollment
 2020**

This project will help the Procurement Service Center (PSC) to implement an integrated data mart and interactive dashboard that measures, monitors and manages spend performance. These new tools will drive operational efficiencies and enable a self-service reporting capability across the university.

The interactive dashboard will expedite monthly performance report delivery and reduce time users spend interpreting and reviewing results.

Dashboards will:

- Display the data into an easy-to-use visual format
- Summarize spend data in one integrated view
- Eliminate the need to

Multi-Factor Authentication: Expansion Phase 1	<p>Multifactor authentication (MFA) is a security system that requires more than one method of authentication from independent categories of credentials to verify the user's identity. The goal of MFA is to create a layered defense and make it more difficult for an unauthorized person(s) access to our enterprise systems.</p>	<p><u>Execution</u> <u>Execution</u> <u>Phase</u>The <u>UIS project</u> <u>team</u> <u>executes</u> <u>the project</u> <u>plan with a</u> <u>focus on</u> <u>meeting</u> <u>scope,</u> <u>budget and</u> <u>timeline.</u> <u>Active</u> <u>management</u> <u>of time,</u> <u>cost, quality,</u> <u>change, risk</u> <u>and issues</u> <u>occur during</u> <u>the</u> <u>execution</u> <u>phase.</u> [11]</p>	<p><u>Green</u> <u>Green</u> <u>project</u> <u>status</u> <u>On-</u> <u>track</u> <u>projects</u> <u>are</u> <u>given</u> <u>green</u> <u>status.</u> <u>These</u> <u>projects</u> <u>are</u> <u>running</u> <u>within</u> <u>budget,</u> <u>timeline</u> <u>or</u> <u>scope.</u> [7]</p>	<p><u>Contact us</u> [34]</p>	<p>TBD</p>

This initiative will:

- Increase UIS processing site bandwidth to campus customers and Internet services.
- Increase 1800 Grant connectivity bandwidth to campus customers and the Internet.
- Replace charge-back MOE connectivity cost from UCD with 10Gb/s private BGP peering on new circuit.
- Allow private peering with UCB/UCCS at 10Gb/s in future at two locations (BGP fail-over).
- Allow bandwidth increase between UIS and our ISP Front Range GigaPop (FRGP) immediately to 1 Gb/s, with easy expansion to 10Gb/s in increments as required in future.
- Remove MOE circuit costs from Hosting.com contract.
- Allow Internet2 (I2) route balancing to maximize bandwidth efficiency.

Execution

Execution

Phase

The UIS project team executes the project plan with a focus on meeting scope, budget and timeline. Active management of time, cost, quality, change, risk and issues occur during the execution phase. ^[11]

Green

Green

project status

On-

track

projects

are

given green status.

These projects

are

running within

budget, timeline

or

scope. ^[7]

R25 Upgrade to Lynx	<p>The vendor of the R25 application, CollegeNet is moving to an upgraded platform, Lynx. Moving to this platform is required for ongoing support and new features.</p> <p>This application provides room scheduling capability for CU-SIS Campus Solutions, with a bi-directional interface that processes course catalog information and updates room assignments in CS.</p>	<p><u>Execution</u> <u>Execution</u> <u>Phase</u><u>The</u> <u>UIS project</u> <u>team</u> <u>executes</u> <u>the project</u> <u>plan with a</u> <u>focus on</u> <u>meeting</u> <u>scope,</u> <u>budget and</u> <u>timeline.</u> <u>Active</u> <u>management</u> <u>of time,</u> <u>cost, quality,</u> <u>change, risk</u> <u>and issues</u> <u>occur during</u> <u>the</u> <u>execution</u> <u>phase.</u> ^[11]</p>	<p><u>Green</u> <u>Green</u> <u>project</u> <u>status</u> <u>On-</u> <u>track</u> <u>projects</u> <u>are</u> <u>given</u> <u>green</u> <u>status.</u> <u>These</u> <u>projects</u> <u>are</u> <u>running</u> <u>within</u> <u>budget,</u> <u>timeline</u> <u>or</u> <u>scope.</u> ^[7]</p>	<p><u>Contact us</u> ^[37]</p>	<p>TBD</p>

Project Criteria

Level of effort: 350+ hours of work (between both planning and execution phases)

Complexity: Cross team interdependent (5+ teams needed)

Risk: Work poses a significant risk to the organization

Managed by: Project Managers

Initiative Criteria

Level of Effort: 40+ hours of work

Complexity: Coordination across teams; new technology to UIS

Risk: Work has a future deadline aiming for but has flexibility; target deadline is one quarter away at minimum

Managed by: ADs/Managers

Groups audience:
University Information Services
