Production Maintenance

Production windows affect our "live" systems with real-time data used by students, staff, and faculty. When there is a production window, most systems will not be available to users, unless a production communication states otherwise.

5 p.m. Oct. 18 to 1 a.m. Oct. 19 maintenance for production systems

See All

Non-production Maintenance

Non-production maintenance windows affect the testing and development versions of CU's production systems. These mirrored systems allow UIS staff to develop new features and functionalities and test them before they are moved to production for real-time access by our customer base.

6 a.m. to 6 p.m. Sept. 25 maintenance for non-production systems

See All
Campus Solutions Maintenance

Campus Solutions windows are for maintenance on Campus Solutions (CS), the student system and primary component of CU Student Integrated Systems (CU-SIS). It encompasses many functions directly related to student administration, faculty workload and course management.

Campus Solutions can also be down during scheduled production maintenance windows.

Other Maintenance

For maintenance that doesn't fall into one of the above categories, it will be listed here.

See All [7]

Completed Maintenance

Once maintenance is completed, details will be listed here.

**Sept. 13** maintenance completed for production services and Campus Solutions [8]

**Aug. 28** maintenance completed for non-production services [9]

**July 26** maintenance completed for production services [10]

**July 12** maintenance completed for Campus Solutions production services [11]

**July 10** maintenance completed for non-production services [12]

Environment Activity

UIS uses many development environments, which are identical environments to our production services to allow for testing.

Do you use our different development environments for testing? Check to see the schedule of
current and upcoming environment activities.
