New CU-SIS Campus Solutions Navigation [1]

Get to know your way around the new CU-SIS Campus Solutions navigation.

CU-SIS Campus Solutions administrative users will see a modernized navigation beginning Oct. 24, based on feedback from administrative users on all four CU campuses. Similar to what you see in your employee portal, the new design’s tile-based navigation system provides better usability, accessibility, mobile-friendly use, personalization and more.

Highlights:

- **New ways to navigate:** You’ll navigate the system using tiles and navigation collections, rather than breadcrumbs. Plus, you will still have access to any CU-SIS Campus Solutions page using the NavBar, Favorites and Recent Places.
- **Keep your favorites:** Do you have favorites saved? Excellent! Any favorites currently saved in CU-SIS Campus Solutions will transfer when the system is updated.
- **Seamless look across portal and CU-SIS Campus Solutions:** The tile-based navigation mirrors the current look of the employee portal. This streamlined user experience enhances navigation across all systems.
- **Create personalized pages:** Go your own way. You will be able to personalize your homepage by moving tiles where you want them or create a new customized homepage with the only tiles you use most.
