Campus Data Hubs (Snowflake) [1]

Campus Data Hubs are UIS-sponsored Snowflake database instances where campus Institutional Research (IR) developers and Data Scientists can combine and compare enterprise data with campus-supplied data in a single Snowflake instance.

Benefits of Campus Data Hubs:

- A modern, scalable framework in Snowflake.
- Options to add third-party solutions built on the Snowflake ecosystem.
- Access to both CIW reporting data and original source data from enterprise systems.
- An affordable and accessible way to combine campus and enterprise data.
- Analytics can be shared back to Central Information Warehouse (CIW) to be used by a wider audience in CU-Data and Tableau reporting.

Who is eligible to use the service: Institutional Research and Central Data Analytics employees can receive access to each Snowflake database.

Data access approval from appropriate Data Management Groups is required.

More information: If you are using a CU VPN, you may also visit the [CU Snowflake resource page][2] to find useful training and documentation on both Snowflake in general and the UIS Campus Data Hubs implementation of Snowflake.
