Access [1]

Accessing CU-Data

How to log in

Users can log in directly to the CU employee portal or through the CU-Data URL.

Log in via the employee portal

Step 1: Connect to a campus network.

Users must connect to a campus network prior to accessing CU-Data. That means physically being at a CU campus and plugged into the network with a cable, or connected to the password-protected wireless network (NOT the Guest network). If off-campus, users must connect to the university VPN. The process to connect to the VPN is slightly different for each campus.

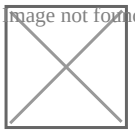

VPNs provide a secure connection to your campus network from any location, as long as your device has an internet connection. CU Denver and CU Anschutz also offer a virtual desktop option.

- CU System Administration VPN instructions [2] (use the System-FullTunnel-MFA VPN)
- UCCS VPN instructions [3]
- CU Boulder VPN instructions [4]
- CU Denver / Anschutz VPN instructions [5]

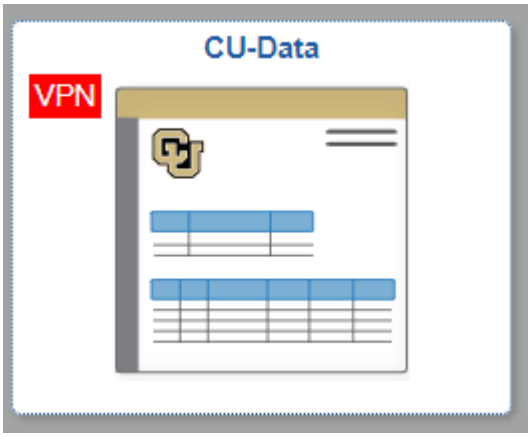

CU affiliates should log in to the CU Denver VPN [6] and connect as normal to access CU content.

Step 2: Log in through the Portal by typing my.cu.edu [7] into a browser, selecting your campus, and logging in using your VPN and AD credentials.

Step 3: In the center drop-down menu, select Reporting and Compliance.

Step 4: Click the CU-Data portal tile.

Log in via CU-Data URL

To log in from your browser directly, go to cu-data.cu.edu [8], select your campus and log in using your campus credentials
