

## **SFTP Access for CU-SIS** <sup>[1]</sup>

CU-SIS SFTP Server is used by customers for Secure File Transfer Program (SFTP) access to CU-SIS Campus Solutions (ICS). The primary use case is to upload or download files for processes where a filepath is specified in a run control. This resource is limited to employees and vendors with a business need to securely transfer files with CU-SIS Campus Solutions processes. This resource is managed by [University Information Services \(UIS\)](#) <sup>[2]</sup> located at the System Administration campus.

CU-SIS SFTP Server access will require approvals from the CU-SIS application managers, and is dependent on a [CU System ID](#) <sup>[3]</sup> for access.

### **Who is this for?**

University Staff members or vendors with a need to upload or download files to the University via SFTP.

### **Who do I ask for help?**

For questions regarding SFTP access, please reach out to the CU-SIS team at the System Administration campus.

### **How do I request access?**

To request access, please fill out the [SFTP Access Request Form](#) <sup>[4]</sup>.
